Ankitkumar Barot

Junior Software Developer

+91-737 57177 ankitbarot26293@gmail.com linkedin.com/in/ankitkumar-barot Ahmedabad , Gujarat, India

SUMMARY

Results-driven Junior Software Developer with over 7+ years of combined technical and operations experience, specializing in full-stack software design, multi-tier application development, and cross-functional project execution. Adept at engineering scalable code architectures, debugging complex codebases, and optimizing data retrieval systems to improve user experience. Demonstrated expertise in translating client feedback into high-performing program functionalities while streamlining international trade compliance and logistics workflows. Proven track record of leveraging precise analytical skills to resolve critical technical challenges, enhance system efficiency by 25%, and accelerate software deployment pipelines for global operations

SKILLS

Programming Languages

PHP JavaScript C++ HTML5 CSS3

Frameworks & Libraries

Laravel React Node.js Bootstrap

Databases & Analytics

MySQL PostgreSQL Relational Database Management Systems (RDBMS)

Systems & Architectures

Object-Oriented Programming (OOP) Model-View-Controller (MVC) RESTful APIs

Tools & Methodologies

Git Version Control Agile Development Software Development Life Cycle (SDLC)

EXPERIENCE

Junior Software Developer & Client Service Associate

Dolphin Web Solution Pvt Ltd

11/2023 - Present Ahmedabad, India

- Architect and execute clean, maintainable server-side and client-side application codebases using modern frameworks to fulfill strict client design specifications
- Diagnose, isolate, and eliminate complex functional bottlenecks and software regressions, reducing system bugs by 30% across production environments
- Collaborate directly with the development manager to engineer system components, formulate architectural workflows, and review structural software designs
- Gather, analyze, and synthesize user feedback regarding application functionality, converting real-world user metrics into actionable product enhancement cycles
- Spearhead the integration of responsive front-end interfaces with secure backend web services, improving end-user interaction speeds by 15%

Intern Software Developer & & Client Service Associate

MAS Software Solution

09/2018 - 10/2023 Ahmedabad, India

- Authored structured programmatic scripts and modular code units for foundational enterprise software products while maintaining standard coding documentation
- Partnered with senior software engineers to facilitate daily application deployments, participate in code reviews, and execute test-driven development methodologies
- Evaluated existing multi-tier software systems to trace underlying logic flows, eliminating legacy code inefficiencies and accelerating execution times
- Resolved high-priority client technical complaints via systematic troubleshooting workflows, maintaining a 96% first-contact issue resolution rate

EXPERIENCE

Import / Export Documentation Specialist

J.P Pharmachem

07/2017 - 08/2018 Ahmedabad, India

- Compiled, verified, and distributed time-sensitive regulatory declarations and trade compliance records to Custom House Agents (CHA) for global shipments
- Synchronized logistical workflows with freight forwarders and customs brokers to optimize supply chain delivery windows and mitigate port storage fees
- Audited inbound and outbound cargo manifests to enforce international maritime trade protocols, eliminating document discrepancy penalties

Import / Export Documentation Executive

Domino Cargos

05/2016 - 06/2017 Ahmedabad, India

- Directed end-to-end global trade documentation portfolios for diverse high-volume corporate accounts across air and ocean freight corridors
- Negotiated operational transport schedules with major shipping lines, International Air Transport Association (IATA) agents, and terminal operators
- Standardized cargo tracking pipelines to provide cross-functional teams with live transit visibility, reducing client status inquiries by 40%

KEY ACHIEVEMENTS

Bug Reduction Achievement

Reduced system bugs by 30% within production environments through diagnosing and eliminating bottlenecks.

User Interaction Speed

Improved end-user interaction speeds by 15% via responsive front-end and secure backend integration.

Client Issue Resolution

Achieved 96% first-contact resolution rate for client technical issues through systematic troubleshooting workflows.

Cargo Tracking Pipeline

Reduced client status inquiries by 40% by standardizing cargo tracking pipelines for transit visibility.

EDUCATION

Post Graduate Diploma in Management (PGDM) in International Trade

Bhartiya Vidhya Bhavan (H.B. Institute of Communication & Management)

2016

- **Core Coursework:** International Logistics, Global Supply Chain Management, Trade Compliance, Export Documentation

Bachelor of Computer Applications (BCA)

J.G College of Computer Application (Gujarat University)

2015

- **Core Coursework:** Advanced Computer Programming, Database Management Systems, Data Structures, Software Engineering Principles
