

FARSHID SHAKERI

WEB DEVELOPER — HTML, CSS, JAVASCRIPT & CLIENT-FACING DESIGN

Burnaby, BC, Canada · Open to Remote or Relocation · 236-788-4667 · Shakerifarshid1@gmail.com

Portfolio: farshidsh.ca · GitHub: github.com/Farshid13sh · LinkedIn: linkedin.com/in/farshid-shakeri

PROFESSIONAL SUMMARY

Web developer with a strong portfolio of designed-and-built projects, specializing in HTML, CSS, JavaScript, and React. I work directly from client goals and branding to a finished, functional site, every project below was designed in Figma and built by the same hands, so nothing gets lost translating a client's vision into code. A decade of prior operations leadership means clear, proactive communication and comfort managing multiple projects at once are habits I already have, not skills I'm building for the first time.

TECHNICAL SKILLS

Front End: HTML5, CSS3, JavaScript (ES6+), React, Next.js, TypeScript, responsive design

CMS & Back End: WordPress & PHP (client builds), REST APIs, SQL & MySQL

Design: Figma, Adobe Creative Cloud, design systems & style guides

Quality & Process: Automated regression testing (Playwright), performance optimization, Git & GitHub

Tools & Deployment: GitHub Actions (CI/CD), Vercel

SELECTED PROJECTS

AccessiLab — Accessibility Simulation & AI Audit Tool | *React 19, Next.js, Figma, Anthropic SDK*

Live: accessilab-next.vercel.app

—Designed the complete UI/UX in Figma, then built it myself in React/Next.js, a live, public tool with no gap between the design and the working product; selected to pitch the architecture at **Web Summit Vancouver 2026**.

—Stayed current with emerging technology by **integrating the Anthropic Claude SDK** into production code and applying AI-assisted workflows to accelerate development while verifying every result myself.

Portfolio — farshidsh.ca | *JavaScript, React 19, Vite 7, Tailwind CSS v4*

—Designed and built a fast, responsive, visually polished site end-to-end, then audited and hardened my own work post-launch, cutting the media payload from **108MB to 14MB** and verifying every fix with **automated regression testing**.

WordPress & PHP Client Work | *WordPress, PHP, MySQL*

—Hands-on WordPress and PHP experience, custom theme development, content architecture, and CMS build for **real clients**, working directly from a **client's goals and branding** to a finished site.

Skillink — Design System & Booking Platform | *Figma, Design Tokens, Vanilla ES6+ JS*

—Audited an existing product's inconsistent visual language and **formalized a complete design system**, tokens, typography scale, component library, UI/UX judgment applied at a systems level, not just a single screen.

WORK EXPERIENCE

Team Lead & Operations Supervisor — City of Burnaby, Surrey & various organizations

- Coordinated cross-functional teams of up to 10+, documenting decisions, running quality checks, and communicating clearly with stakeholders under pressure, the same collaborative discipline working closely with designers, backend developers, and QA calls for.
- Authored operational compliance logs, performance evaluations, and incident reports, documentation discipline that carries directly into maintainable code and technical writing.

EDUCATION

New Media Design & Web Development Diploma — BCIT, Burnaby BC

- Relevant coursework: JavaScript programming, responsive web design, UI/UX design, web development with MySQL, CMS development.

Asset Creation Diploma — Think Tank Training Centre

Bachelor of Engineering, Metallurgy — IAUN

RECOGNITION

- Selected to pitch AccessiLab live at Web Summit Vancouver 2026.
