

Behnoosh Moudi

Network Security Engineer | MSc Networking & Cyber Security (2026)

London, UK | 07745848018 | Behnoosh.moudi@gmail.com | [linkedin.com/in/behnoosh-moudi](https://www.linkedin.com/in/behnoosh-moudi) | Full UK Driving Licence

PROFILE

Recent MSc graduate in Networking and Cyber Security (London Metropolitan University, 2026) with a solid grounding in Cisco routing and switching, LAN/WAN infrastructure, and network security. Dissertation focused on **AI-Enhanced Zero Trust Architecture for Hybrid Enterprise Networks**. Backed by hands-on experience supporting network infrastructure in UK commercial and international banking environments. Looking to establish a career within a UK network team where I can apply my technical knowledge and continue to grow professionally. Eligible to work in the UK.

EDUCATION

MSc Networking and Cyber Security | **London Metropolitan University, UK** Feb2025 – May 2026

Dissertation: *AI-Enhanced Zero Trust Architecture for Hybrid Enterprise Networks*

- Key modules: Network Routing Protocols (CCNP level), Switched Networks (CCNP level), Network Troubleshooting, Cyber Security

MSc Computer Networks | **Iran University of Science and Technology, Tehran** Completed 2011

- Key modules: Network Protocols & Architectures, Advanced Routing & Switching, Network Security, Wireless & Mobile Networks

TECHNICAL SKILLS

Routing & Switching	OSPF, EIGRP, BGP, VLANs, STP, HSRP, NAT, QoS, VPN
Cisco Platforms	Cisco IOS — 1700, 1800, 2600, 2800, 3600, 3750, 6500, 7613 series
Security	Zero Trust Architecture, pfSense Firewall, Network Segmentation, AI-Based Anomaly Detection
Tools	SolarWinds, PRTG Network Monitor, Wireshark, Cisco Packet Tracer
Infrastructure	TCP/IP, LAN/WAN, Structured Cabling, IOS Upgrades, Network Troubleshooting

EXPERIENCE

Network Administrator (Part-Time) | **Harry Freeman Co – London, UK** Apr 2019 – Feb 2023

- Managed internet connectivity and network infrastructure in a Windows-based UK commercial environment.
- Configured and troubleshot routers, switches, and POS systems to maintain operational reliability.
- Provided remote technical support and resolved network connectivity issues for end users.
- Maintained day-to-day IT operations, supporting staff with systems and Microsoft Office applications.

Feb 2023 – Feb 2025: Full-time IELTS preparation and MSc application process.

Network Support Engineer | **Saman Bank – Tehran, Iran**

Mar 2011 – Feb 2019

- Supported configuration and maintenance of Cisco routers and switches in a large enterprise banking environment.
- Worked with routing protocols including OSPF, EIGRP, BGP, VLANs, and QoS across WAN/LAN infrastructure.
- Monitored network performance using SolarWinds and PRTG; assisted in diagnosing connectivity and routing issues.
- Participated in IOS upgrades, structured cabling projects, and network infrastructure rollouts.
- Provided first and second-line technical support for users and network applications.
