

KIT GEDA

Web Developer

omri.kit.geda@gmail.com • 382-889-6054 • linkedin.com/in/o-k-g • github.com/O-K-G • kit.codes • Elmira, ON, Canada

Can relocate easily anywhere in Canada

PROFILE

Web Developer with 6+ years of experience specializing in accessible React applications for local and global finance and tech markets. Strong communicator adept at aligning technical teams with non-technical colleagues and clients. Dedicated to continuous learning and high code quality, efficiency, and team collaboration. Not shy of independently turning existing 'spaghetti code' into an ordered and easy to read modular code, so a strong documented base will make everyone spend less time on maintenance.

TECHNICAL SKILLS

Programming Languages JavaScript & TypeScript, familiarity with Python

Front-End React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS

Back-End and Databases Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Firebase

State Management React Context, TanStack Query, Redux, Zod

APIs RESTful APIs, Microservices, GraphQL

Validation Zod, SwaggerHub

Testing Jest, React Testing Library, Playwright

Development Tools Claude Code, Git, GitHub, Azure, Docker, Storybook, Postman, Mockoon

Accessibility WCAG 2.x, AODA, NVDA, JAWS

Design and Marketing Figma, Canva

Marketing Webflow, Sanity, Google Tag Manager, Google Search Console, HubSpot

Project Management Jira, Asana, Agile / Scrum

Operating Systems Ubuntu and Arch Linux, Windows, Mac

PROFESSIONAL EXPERIENCE

Web Developer

Voltera Inc. • Waterloo, ON, Canada • 2025 — Present

- Serve as the lead developer for the company website, handling daily maintenance, CMS integrations, and feature updates based on design requirements.
- Plan and run a gradual migration to a new fluid design for the website with better accessibility compliance, keeping both versions running smoothly in parallel until the final switch.

Key Achievements

- **Dropped the site's data payload by 90%** to improve page performance and loading speeds, thus also improving Search Engine Optimization (SEO) results.
- **Cleaned up 95% of a complex legacy codebase**, making it modular and standalone so developers of any level can safely commit code without breaking global features.
- Strengthened web security by tracking down vulnerabilities, shipping fixes, and introducing strict code sanitization.
- Validated incoming data from third-party systems to fix layout and accessibility issues before they reached the user.

Web Developer and Tech Lead

FAI Systems • Toronto, ON, Canada • 2024 — 2025

- Led front-end architecture for a drag-and-drop UI tool built on Next.js, defining core design patterns and system integrations.
- Enforced strict modularity across the codebase to ensure long-term scalability and prevent technical debt as the engineering team expanded.

Key Achievements

- Delivered the initial proof-of-concept (POC) phase in **half the projected timeframe**.
- Engineered the POC with Docker integration and isolated, testable components, establishing a production-ready foundation rather than a throwaway prototype.

Team Leader, Web Developer and Scrum Master

Bank Leumi (Razel Group) • Lod, Israel • 2021 — 2024

- Built and optimized a new business banking portal, ensuring code quality met the rigorous security, accessibility, and cross browser compatibility standards required by enterprise clients and top stakeholders.
- Balanced day-to-day coordination between front-end, back-end, design, product, and QA teams to keep product releases running smoothly.
- Advanced quickly through a promotion from a junior role to Team Lead and Scrum Master, taking on the responsibility of onboarding and mentoring developers at all levels.

Key Achievements

- Designed a core POC application that was **successfully adopted as the baseline framework** for subsequent web projects.
- **Saved several months of development time** by successfully forking and adapting an existing UI library to fit new project specs.
- Led the site-wide localization and Internationalization (i10n + i18n) initiative, **successfully rolling out full multi-language support**.
- Documented all newly built front-end components into Storybook for better team collaboration.
- Enforced a 90% unit test coverage target with Jest to guarantee a stable, production-ready platform.

Founding Web Developer

FAI Systems • Toronto, ON, Canada • 2020 — 2021

- Owned the end-to-end development of the company's first public website, establishing the core user authentication and registration flows as the standalone engineer.
- Supported early fundraising efforts by developing technical presentation materials and joining pitches to venture capitalists.

EDUCATION AND CERTIFICATES

- Web Development Bootcamp • Udemy • 2020
- Graphic Design • Coursera • 2018
- Bachelor of Arts • Tel-Aviv University, Israel • 2012
- Full G Canadian driver's license
