Jesse Matthew

Melbourne-based filmmaker

I completed my Bachelor's degree at SAE Creative Institute in May 2023. I enjoy working across different areas in the film industry which includes producing, screenwriting, editing and gaffing amongst many other roles.

I'm aiming to further develop my skills and build my network across the industry.

JOB EXPERIENCE

Editor&Colorist: Fuel Cell, 2023

For this project, I cut together and colour graded 2 Social media reels that highlighted concerts done by artist Kizz Daniels.

Taking on this role helped me further develop my skills in editing as I was able to learn more about cutting on beat with with the music and also gain a better understanding on how colour grading works.

Editor & Colorist: Crossway Baptist Church, 2022

I did a work-placement at Crossway where I worked as an editor creating various social media reels promoting the events the Church was throwing. I also cut together interviews, helped set up for shoots (lighting) and I also got to learn more about colour grading which I was then able to apply.

Editor & Sound recordist: The Big Canvas, 2024 - present

I worked as a freelancer for The Big Canvas where we took on a project for the Department of Transport creating a series of modules educating staff members about Indigenous culture and history. My role included setting up Lapel microphones to record audio while on set and then sync it up with the footage and then cut the videos together for the modules.

Software

Adobe Premiere Pro

Adobe After Effects

Adobe Photoshop

Audacity

Industry Roles

Editor

Assistant editor

Colourist

Education

SAE Creative Institute Melbourne: Bachelor of Film, 2021 - 2023

My film-making aspirations really took of during my time at SAE as it was there I really learned how to make films and how the process works. It has helped lay the foundations of my understanding of what a professional film set should look like and also how to collaborate with others to create the final product.

Mount Waverley Secondary College: High-school 2020

I studied at MWSC from year 7 to year 12. From year 9 onwards, I was given the chance the study media related subjects where I was able to learn the basics of film and also made 3 short films and a documentary during my time there.
