ROHIT RAI

Web Developer

+92 328 2366798 | rohitrai8907@gmail.com | GitHub

SUMMARY

Full Stack & Web Developer with extensive experience designing and developing responsive, high-performance web applications using JavaScript, HTML/CSS, React, Next.js, and Node.js. Proven background translating client specifications and Figma design systems into accessible, cross-platform web solutions. Experienced in building modular component libraries, optimizing RESTful APIs, and implementing WCAG standards to deliver exceptional user experiences.

TECHNICAL SKILLS

JavaScript, HTML5 & CSS3, React.js, Next.js, Responsive Web Design, UI/UX Design (Figma), Tailwind CSS, TypeScript, Front-End Development, Node.js, Express.js, RESTful API Development, State Management (Redux, Zustand), WCAG Accessibility, MongoDB, PostgreSQL, Web Performance Optimization, Git & CI/CD

EXPERIENCE

Full Stack Developer (MERN/PERN) — Designo Graphy | Canada (Remote)
Apr 2025 – Present

- Architect and develop scalable full-stack applications using React, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL.
- Design and implement enterprise-grade interfaces, translating product requirements into high-performance web experiences.
- Build and optimize REST APIs, backend services, and database queries to ensure high availability and responsiveness.
- Establish reusable component libraries, engineering best practices, and CI/CD deployment pipelines to accelerate velocity.

Senior Node.js Developer — Saynt AI (Remote)
Nov 2023 – Mar 2025

- Engineered scalable SaaS backends and high-performance RESTful APIs utilizing Node.js, Express.js, and MongoDB.
- Architected modular backend services focusing on clean separation of concerns, long-term maintainability, and reliability.
- Implemented secure JWT authentication, role-based access control (RBAC), and third-party API integrations.
- Refactored legacy database queries and API endpoints to significantly optimize server response times.

Senior Lead Frontend Engineer — Sinkitec (Remote)
Feb 2021 – Oct 2023

- Led frontend architecture for the flagship platform, integrating scalable React applications with backend microservices.
- Developed a modular component library using React.js and TypeScript, increasing UI consistency and development speed.
- Established frontend standards for state management, WCAG accessibility, and performance optimization while mentoring junior developers.

Lead UI/UX Designer & Frontend Developer — JOVANNOTTI | Italy (Remote)
Mar 2020 – Jan 2021

- Designed modern web interfaces in Figma and translated high-fidelity prototypes into code using Next.js, React, and Tailwind CSS.
- Applied WCAG accessibility principles and managed responsive design workflows across desktop, tablet, and mobile layouts.

PROJECTS

MERN Canva Clone – Full-Stack Design Platform
Built an interactive canvas editor with Fabric.js supporting custom drawing, text, element locking, and multi-format exports. Architected a Node.js microservices infrastructure with API Gateway, Auth.js authentication, and Cloudinary AI image generation. Tech: Next.js, React, Node.js, Express, MongoDB, Fabric.js, Zustand, Auth.js, Tailwind CSS, Cloudinary, PayPal.

Full-Stack Realtime Spotify Clone

Developed a music streaming platform featuring full playback controls, queue management, and an administrative song/album dashboard, with real-time chat and presence via Socket.io and Firebase. Tech: React.js, Node.js, Express.js, MongoDB, Socket.io, Redux Toolkit, Tailwind CSS, Framer Motion, Firebase.

Ecommerce Website

Built a responsive e-commerce web app with product search, shopping cart, order tracking, and Razorpay payment integration. Tech: React.js, Firebase Authentication, Redux, React Router, Tailwind CSS, Razorpay.
