Full-Stack PHP Developer | Laravel · Vue.js · AI Automation | 6+ Years Experience

Dubai, UAE ralphlaynes@gmail.com

+971551620531

Summary

Full-Stack PHP Developer with 6+ years of commercial experience building and maintaining production web applications across the Philippines and UAE. Experienced in PHP, Laravel, CodeIgniter, Vue.js, WordPress, MySQL, REST APIs, Docker and Nginx.

Hands-on experience includes business platforms, booking systems, dashboards, API integrations, production deployment, web application security and AI automation. CompTIA Security+ and Network+ certified.

Experience

Web Developer

Bab Alomda Information Technology Corp., Dubai, UAE *Mar 2026 — Current*

- Develop and maintain production web applications using PHP, Laravel, WordPress, Vue.js and MySQL for live sports platforms.
- Build custom backend modules, REST API integrations, admin tools and data-driven features.
- Run Docker-based environments and support virtualization workflows for development, testing, deployment, and server operations.
- Maintain, optimize, and deploy websites for the iGaming industry with a focus on reliability, security, performance, and production uptime.
- Configure and maintain Nginx web server setups, deployment processes, domain routing, SSL/TLS configuration, and performance optimization.
- Apply website hardening practices including access control, server configuration review, vulnerability reduction, secure deployment habits, and ongoing monitoring.
- Perform web application security testing and vulnerability assessments, including authentication, access control, input validation, API security and common OWASP web risks.

Web Developer

Emirates Scholar Research Center (part of / operating under Geminos Group), Dubai, UAE *Sep 2022 — Mar 2026*

- Developed, maintained, and enhanced client websites, portals, booking systems, dashboards, and event platforms using PHP, Laravel, CodeIgniter, WordPress, JavaScript, and Vue.js.
- Translated client requirements into technical specifications, database structures, user flows, and functional system architecture.
- Built custom features including registration workflows, content management tools, multilingual pages, lead forms, and admin dashboards.
- Integrated APIs, automation workflows, and third-party services to reduce manual work and improve operational efficiency.
- Provided production support, bug fixing, deployment assistance, and live-event technical support for business-critical platforms.

Web Developer

Lucy Security/ThriveDX, Tayabas, Quezon, Philippines *Apr 2020 — Aug 2022*

- Developed e-learning websites and interactive security awareness content using HTML, CSS, JavaScript, and ReactJS.
- Built phishing simulation pages and training flows using PHP, HTML, CSS, and JavaScript to support cybersecurity awareness programs.
- Updated, designed, and maintained client-facing web content based on campaign and training requirements.
- Created Rise Articulate lessons and user education materials focused on phishing, malware behavior, and prevention best practices.
- Supported WordPress website updates, troubleshooting, and content improvements for company and client properties.

Junior Web Developer

GLEENT Inc., Laguna, Philippines *Sep 2019 — Mar 2020*

- Supported the development and maintenance of client websites using PHP, WordPress, HTML, CSS, JavaScript, and MySQL.
- Built and updated responsive web pages based on client requirements and provided designs.
- Assisted with bug fixing, website troubleshooting, content updates, and basic performance improvements.
