Tools & Methodologies: Agile, Scrum, Jira, Trello, Redmine

Work Experience

Lumina Future – *Full-stack Developer*

Canada (Remote) • June 2024 – June 2026

MedicaSync (*July 2024 – June 2026*)

- An app designed to help health professionals across Canada manage their operations with patients more efficiently.
- Designed and implemented the application architecture, integrated REST APIs, and worked on a responsive, user-friendly mobile application for patients and on a dashboard for clinicians. Developed intelligent features for patients and for clinicians in dashboard (smart reports, search and graphs), wrote a parser to present actual data for patients. Implemented chats, data security mechanisms and optimized application performance across the platform.
- Tech Stack: Python, Django, .NET Core, React, TypeScript, ReactNative, PostgreSQL, AntD, GCP

TimelineColiving (*June 2024 - October 2024*)

- A booking system for co-living managers, featuring advanced date management tools to handle shared spaces and overlapping stays.
- Implemented complex multi-year scheduling functionality, integrated REST APIs, developed booking management features, and enhanced the user experience with smooth animations and interactive UI effects.
- Tech Stack: Node.js (Express.js), React, TypeScript, PostgreSQL, AntD

The Ambassador Platform – *Full-stack Developer*

London, UK (Remote) • Aug 2019 - Nov 2023

- Developed and maintained a cross-platform EdTech solution consisting of mobile app, web platform, admin & super admin panels.
- Integrated features such as student profiles, live video chats, forums, group messaging, and SSO authentication.
- Contributed to scalable architecture and efficient user management systems used by 50+ universities.
- Collaborated in a 30-person Agile team across frontend, backend, and DevOps.
- Tech Stack: React, React Native, Node.js (AdonisJs), TypeScript, AWS, PostgreSQL, AntD

[Company Site](#)

Razom Solutions – *Full-stack Developer*

Ivano-Frankivsk, Ukraine • Sep 2016 - Oct 2018

Dispatch CRM System (*Dec 2017 - Oct 2018*)

- Created CRM for dispatchers to assign trucks, generate delivery routes, and calculate costs & salaries.

Tech Stack: Node.js, Angular 5, Bootstrap 4, Sequelize, Express.js

GasVisor (*Mar 2017 - Oct 2017*)

- Developed gas station locator with price/rating comparison, route planning, and station creation/moderation.

- Tech Stack: WordPress, jQuery

FreightSeeker (*Sep 2016 - Mar 2017*)

- Built logistics web platform connecting users with freight carriers, supporting order placement and route optimization.
- Tech Stack: Laravel, Angular, MySQL, Web Services, Materialize
freightseeker.com

VisaHQ – Full-stack Developer

Ivano-Frankivsk, Ukraine • June 2015 - June 2016

- Developed features for global visa/passport processing portal, supporting thousands of daily transactions.
- Tech Stack: PHP, JavaScript, jQuery, MySQL
visahq.com

Education

National University of Radioelectronics (KNURE), Ukraine

Master's Degree - System Software Development

Equivalency: Assessed by WES Canada
