PROFESSIONAL EXPERIENCE

· Full Stack Web Developer, Groupe Jean Rouyer Automobiles
From september 2020 to april 2025, France
Progressed from a Full-Stack Intern to Lead Developer within a team of three people. Architecture, full-stack development, DevOps, CI/CD, testing, deployments, and maintenance of an ecosystem of 6 to 10 interconnected applications. Led a major migration from PHP/MVC to React/TypeScript, using PostgreSQL, Prisma, Redis, Docker, and GitLab CI/CD. Developed business applications used by 500 to 1,500 users, resolved production incidents, made technical decisions, and supervised and mentored work-study students.

· Freelance Web Developer
Since june 2019, France
Full Stack Web Developer
Development of custom web and business solutions for small businesses and SMEs: business applications, Shopify e-commerce, WordPress, and maintenance of existing applications. End-to-end project management, from requirements analysis to deployment and maintenance. Tech stack: React, TypeScript, Next.js, NestJS, Node.js, Shopify, WordPress. Notable projects include the development of a web application for managing a skills matrix based on an existing Excel tool.

· Analyst Programmer PHP alternate, GAC Synergie
From october 2019 to august 2020, France
Improvement of the "Évolution" ERP used by French UDAFs:
new functionalities, database modifications.

· Web junior Developer, Shop'n co
From july 2018 to june 2019, France
Creation of e-commerce stores, using Shopify.
Development of a Mondial Relay application for Shopify.

· IT Trainee, Hôpital de Cholet
From january 2019 to mars 2019, France
Design of an operation monitoring tool. Application that generates a schedule of tasks performed by the hospital's servers and enables the user to configure the necessary checks to validate task execution.

· Web Developer Volonteer, The N'joy Festival
Since april 2018, France
Creation of a customized website, creation of a volunteer management and emailing module for the association.
